Turn enterprise knowledge into confident, AI-driven decisions

Give your teams a safe, practical way to use AI with your own business information. This accelerator helps people find answers faster, reduce manual work, and automate everyday tasks, while keeping data secure and under your control.

You get real results quickly, without introducing risk or changing how your teams work.

The Challenge

AI is already at work in your company, but public tools are exposing your private data to the world. You don't need to be convinced you need a custom solution; you just need a safe, realistic way to get moving.

The Solution

In **as little as 15 days**, our Gemini for Enterprise Accelerator gives your team a secure, private AI tool that knows your business. Choose from options that let you:

- **Find anything instantly** across all internal documents and systems.
- **Automate the grind** of summarizing meetings, emails, and reports.
- **Scale safely** by generating on-brand content without the risks of public AI.

What's Included

› **A Safe AI Foundation**
AI access stays inside your environment, using only approved data.

› **Connected Business Systems**
Choose up to 5 systems your teams already rely on.

› **AI Assistants for Everyday Work**
Choose up to 3 assistants designed around common needs.

Business Impact

Teams spend less time searching and more time doing	Sensitive information stays protected	AI use becomes consistent and reliable	Leaders gain confidence in where AI delivers value	You establish a foundation that can grow over time

Delivery Timeline: 15-day technical sprint, ~4 weeks end-to-end

Built on Google Cloud

Delivered on Google Cloud using Gemini for Enterprise, cloud-native security, and scalable infrastructure aligned with Google best practices.
