

ADA COMPLIANCE ENGINE · APRIL 2027 DOJ MANDATE · TITLE II ADA

Every SLED account has a legal deadline and **no scalable plan.**

ADA compliance is non-discretionary spend unlocked by a federal mandate. The budget exists. It just needs a vehicle. Nerders's ADA Compliance Engine is the solution. It converts legacy PDFs into WCAG 2.1 AA-conformant HTML — fully automated, running inside the agency's own GCP project.

AGENCIES FACING APRIL 2027

Why the ADA Compliance Engine opens doors for you

01

Clients use existing GCP commit

No new budget approval required. Marketplace transacting lets clients use existing EDP spend. Compliance budget — not IT discretionary.

02

Opens accounts where AI has stalled

A legal mandate bypasses IT budget scrutiny. A direct wedge into SLED accounts that haven't responded to broader AI and modernization pitches.

03

Drives real Gemini Enterprise usage

Every document processed runs Gemini on Vertex AI. Drives consumption that sticks and builds the GCP relationship beyond the initial engagement.

What the ADA Compliance Engine does

Legacy PDFs in WCAG 2.1 AA HTML out

Ingests batches via CSV, XLSX, JSON, or URL. Gemini on Vertex AI extracts structure. Outputs conformant HTML with a per-document quality report.

Runs inside the client's own GCP project

Data never leaves the agency's perimeter. Built natively for government. No vendor infrastructure. No compliance exposure.

Human-in-the-loop quality guardrails

Automated pipeline with independent Gemini QA review. The system never grades its own homework. Standards enforced before output is delivered.

Procurement ready Live in two states

Set up with Carahsoft, NASPO, and SHI. PSO-approved. In production in North Carolina and Hawaii. Active conversations in five additional states.

A fit for every agency

SILVER

Identification

Starting at

\$75,000

For agencies needing immediate visibility into compliance gaps before committing to full remediation.

INCLUDES

- PDF accessibility identification
- Looker Studio compliance dashboard
